

BIOLOCK-98 Fingerprint Lock

BioAccSys

Fingerprint

Code

Mechanical Key

9V Battery

Features:

- + Exquisite appearance, Rational structure, Safe & reliable fingerprint electronic lock.
 - + Suitable for Villa, Office, Apartments and internal secured rooms. Many ways of high-security unlocking methods.
 - + Adopt standard 59mm. lock hole, no need to drill another hole and very easy to install.
 - + Battery life-time: Exceed 15,000 times under normal use.
 - + U-design handle is the first choice, maximum protection.
 - + The users' fingerprint can be deleted individually
1. Adopt international advanced sensor technology, ensuring the reliability.
 2. Sliding cover protect the sensor. Anti-moisture, anti-dust, is suitable for using under all weather conditions.
 3. Using 4 x 1.5V standard alkaline batteries. Energy saver design for extending the battery life.
 4. User can have a passage mode option.
 5. Soft music tone reminders and light indicators.
 6. Capacity for 150 fingerprints users, especially suitable for children and the seniors to use.
 7. Free rotating handle to avoid damage.
 8. Special lock body with "nanotechnology" surface, updated and durable.
 9. Pure stainless steel mechanical rotating structure.

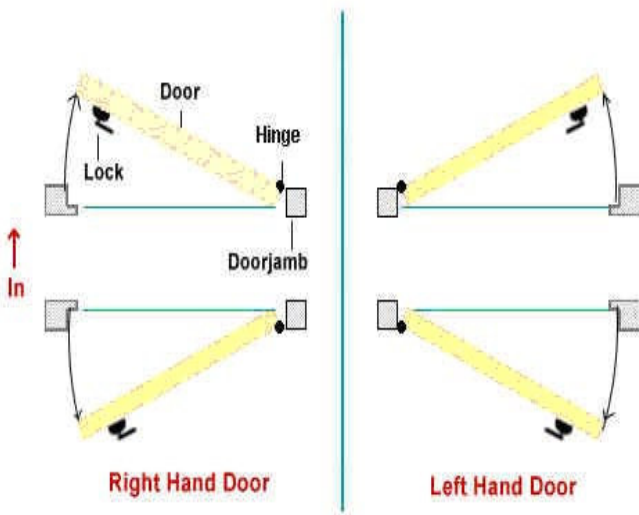

BIOLOCK-98 Fingerprint Lock

BioAccSys

SPECIFICATION

Collect Area:	18.2mm(L)X16mm(W)
False Identification Rate(FAR):	<0.0001%
Maximum Capacity of Templates:	150
Start Time:	<1 second
Encoding Time:	<1.0 second per encoding
Driving Time:	<0.2 second
Resolution Factor:	560 dpi
Power Consumption Suitable for Battery Operation:	<400mA (driving) <100mA(activity) <40uA(static)
Operating / Reserve Voltage:	9v
Warning Voltage:	4.8v
Antistatic Voltage:	>15000v
Working Temperature:	-20;æ-60;æ(out door)
Password Capacity:	75 people
Password Length:	8 bytes
Password Set Up:	Be Able to Change Any Combination
Unlocking Modes:	Standard: Fingerprint + Code + Mechanical Key
